| Comments: | | | | | | | | | | |
| | Can be purchased from SAP or through a software reseller. Recommended reseller available upon request. | Unlimited users supported at no additional cost | Integration with Microsoft Power BI, including ability to serve PBI dashboards, scorecards and KPIs. Also provides proprietary KPI and scorecard functions. | Can also publish docs from Word, Excel, PDF, etc. | Can also publish SSRS, FRX and SQL reports; Word, Excel, text and PDF documents; and web applications. | Individual users can be purchased for \$35/user/month. | | * Support price shown is a discount assuming purchase of support and maintenance at the same time as the license | Supports PPT,Universes, noSQL, HANA, SFDC | Supports PPT,Universes, noSQL, HANA, SFDC |
| | You can also purchase 5 named users (NULs) for \$2,400. These are each limited to a specific person | They provide full ASP.Net source code for the web portal itself. | Includes web service API for integration/OEM with other tools and systems. | Allow users to search for reports | API available that allows integration with your own web portal including executing reports from within your own application. | * Each user subscription includes a copy of Logicity Professional, which provides scheduling capabilities on the local network (not through Bezio). | *Support price shown is a discount assuming purchase of support and maintenance at the same time as the license | Web report access is controlled through Windows/IIS web server permissions. Row level security can be set using report parameters or a Record Selection Formula. | Available as a vmware image | Enhanced parameters types for applications (i.e. radio buttons) |
| | | Web Portal includes 2 licenses for Report Runner Batch Enterprise Scheduler, which provides scheduling features. | * License provides for: 1 server with unlimited cores/processors, unlimited users & unlimited admins | Allow users to designate reports as favorites and they will display on the users home page for easy access | Scheduling feature includes 'event-based' scheduling triggered by changes in a file or database record. Also has pre and post schedule database triggers. | ** Bezio allows you to build interfaces and data connections to allow you to read and write any data source behind your firewall. | Web report access is controlled through Windows/IIS web server permissions. Row level security can be set using report parameters or a Record Selection Formula. | ** Parameter values may be passed in from a web link or another application. Parameter values may optionally be encrypted. | *Activity Launch is an additional \$1000 | Available as a vmware image |
